

## FREE Software Available to protect your family from the harsh realities of the Internet

While at school, "Internet filtering" technology allows your children to access the best of the Internet while being shielded from the worst.

Want to have that same protection at home? MOREnet and Internet filtering for schools specialist Lightspeed Systems have teamed up to bring Lightspeed's outstanding software to your home -- at no cost to you when you register by December 31, 2007.

This easy-to-install software works with PCs using any major web browser (e.g., Internet Explorer, Firefox) (Mac version available soon)

- You can be protecting your family from inappropriate content in just five minutes.
- Reports on your children's web activities can be delivered by the next day! So you'll know what they were blocked from seeing as well as everything they were able to access.

To learn more, ask a question and **download your free Internet filtering software** (less than 500k file), go to: [www.lightspeedguide.com](http://www.lightspeedguide.com)

Thank you for your support!

### Internet Safety Night

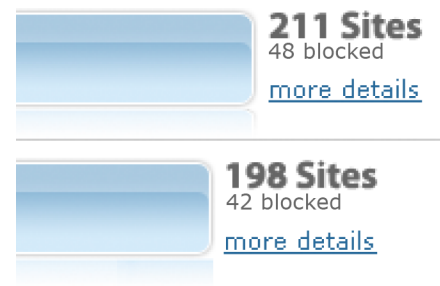

The Missouri Research & Education Network (MOREnet)  
October 23, 2007

## Simple Categories

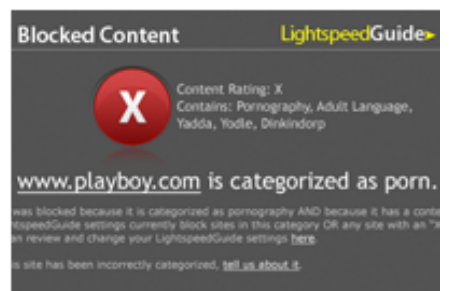

-  Generally Safe
-  Parental Guidance
-  Restricted Adult Material
-  Pornographic
-  Security Risk

## Powerful Reports
